XT550

Bariatric Scooter

The new XT 550 accommodates riders up to 550 pounds. The XT550 has reinforced front and rear frames, seat base and seat height adjustment tube as well as front fender supports - making this one of the most rugged scooters available.

The XT 550 is only 48 inches long, and has a turning radius that turns on a dime making it as maneuverable as most small scooters - so you don't have to sacrifice indoor operation to get a heavy duty scooter.

Features:

Additional Aluminum Cross bracing
Provides greatly increased frame strength with minimal weight added to the scooter.

Deluxe Extra Large Seat
Wider and deeper than most scooter seats for maximum comfort, these seats also include adjustable width armrests (out to 27"). Available in cloth or vinyl.

More Power
The XT 550 is equipped with added special gearing to give the rider approximately 20% more power than the already powerful Scooter.

Patented Disassembly
You won't believe how easy it is. The frame separates in seconds with the pull of a handle.

Transportation
It goes where you go. It's easy to handle and loads within seconds. The heaviest piece weighs only 58 pounds.

Powerful Trans-axle drive
24volt DC motor combined with rear wheel drive provides plenty of power to go where you want to go. The XT 550 is available in an ultra quiet, fully enclosed, rubber mounted shock resistant trans-axle drive assembly.
